Welcome address *Hiroataka Sugawara* (Director General, KEK)

Session 1. Objectives and Motivations

- **Precise measurement of neutrino oscillations and the systematic errors of the neutrino-nucleus interactions -**
(Chairman: M. Sakuda / Y. Akaishi)

<i>NuInt</i> overview and K2K/JHF	6
<i>Yoshitaka Itow</i>	
Precise determination of the oscillation parameters: need to understand low energy neutrino interactions	6
<i>Adam Para</i>	
τ appearance and CNGS	3
<i>Masahiro Komatsu</i>	
Neutrino and anti-neutrino cross sections and CP phase measurement	6
<i>Yoshihisa Obayashi</i>	
Determination of neutrino oscillation parameters with atmospheric neutrinos	6
<i>Kenji Kaneyuki</i>	
Neutrino-nucleus reactions in supernovae	6
<i>Karlheinz Langanke</i>	
Leptogenesis with Majorana neutrinos	6
<i>Emmanuel A. Paschos</i>	
Structure functions of the nucleon and nuclei in neutrino interactions	7
<i>Shunzo Kumano</i>	

Session 2. Theoretical Issues of Neutrino-Nucleus Interactions and Nuclear Effects

- **Nuclear effects in electron-nucleus interaction theory -**
(Chairman: J.G. Morfin)

Many-body theory of electron-nucleus scattering	6
<i>Vijay R. Pandharipande</i>	
Neutrinos and non-perturbative nucleon structure	6
<i>Anthony W. Thomas</i>	
Resonance region to DIS, quark-hadron duality at Jefferson Lab	7
<i>Stephen A. Wood</i>	

Modeling deep inelastic cross sections in the few GeV region	7
<i>Arie Bodek</i>	
Electroweak form factors	9
<i>Shri Krishna Singh</i>	

Session 3. Theoretical Issues of Neutrino-Nucleus Interactions and Nuclear Effects

**- Neutrino-Nucleus interactions -
(Chairman: C.W. Walter)**

Low energy electron-nucleus DIS experiments at Jlab and Hermes	*
<i>Edward Kinney</i>	
Neutrino interactions at low and medium energies	9
<i>Emmanuel A. Paschos</i>	
Nuclear correlation effects in neutrino-nucleus interactions	8
<i>Jacques Marteau</i>	

Session 4. Overview of the existing and new data on neutrino-nucleus interactions and their uncertainties

(Chairman: C.W. Walter / Y. Itow)

Low multiplicity final states in neutrino interaction at low energies	
– SKAT BC results	*
<i>Vladimir Ammosov</i>	
Results from low-energy neutrino-nucleus scattering experiments	7
<i>Makoto Sakuda</i>	
Total cross section measurements for ν_μ , $\bar{\nu}_\mu$ interactions in 3-30 GeV energy range with IHEP-JINP detector and future plans	8
<i>Anatoli S. Vovenko</i>	
A study of nuclear effects in ν interactions with the NOMAD detector	8
<i>Michele Veltri</i>	
Charged-current inclusive distributions from K2K near detectors	8
<i>Taku Ishida</i>	
Quasi-elastic events and nuclear effects with the K2K Sci-Fi detector	6
<i>Christopher W. Walter</i>	

Neutral current π^0 production in K2K and Super-Kamiokande <i>Christopher Mauger</i>	8
Study of ν backgrounds to nucleon decay searches using K2K 1KT detector data <i>Shun-ichi Mine</i>	5

Session 5. MC generators and Theoretical Calculations

Session 5-1. Comparison of MC generators (Chairman: D. Casper)

The nuance neutrino physics simulation, and the future <i>David Casper</i>	10
NEUT (SuperK / K2K) <i>Yoshinari Hayato</i>	6
MC generators in CHORUS <i>Ilya Tsukerman</i>	6
NUX-neutrino generator (Nomad / Icarus) <i>André Rubbia</i>	*
GENEVE: a Monte Carlo generator for neutrino interactions in the intermediate energy range (ICARUS) <i>Flavio Cavanna</i>	5
The NEUGEN neutrino event generator (MINOS / Soudan 2) <i>Hugh Gallagher</i>	7
MiniBooNE event generators <i>Geoffrey Mills</i>	*

Session 5-2. Benchmark theoretical calculations (Chairman: R. Seki)

Quasi-elastic neutrino-nucleus scattering and spectral function <i>Hiroki Nakamura</i>	6
Nuclear correlation effects in neutrino-nucleus interactions <i>Jacques Marteau</i>	7
Nuclear re-interaction effects in quasi-elastic neutrino nucleus scattering <i>Gimpaolo Co'</i>	5
Inclusive quasielastic ν reaction in ^{16}O <i>Shri Krishna Singh</i>	5

Session 6. Panel Discussion

(Chairman: R. Seki / D. Casper)

Summary of comparison of benchmark calculations	*
<i>Ryoichi Seki</i>	
Fermi gas model	3
<i>Gerald A. Miller</i>	
Correlation / final-state interactions	*
<i>Vijay R. Pandharipande</i>	
Current conservation and exchange current	*
<i>Kuniharu Kubodera</i>	
Nuclear effects and the NuTeV $\sin^2\theta_W$ measurement	8
<i>Kevin McFarland</i>	

Session 7. Future experiments and facilities

(Chairman: A. Para)

Muon storage rings for a beam-systematic-free measurement of neutrino and antineutrino cross-sections at low-energy	9
<i>André Rubbia</i>	
New near detector of K2K, its physics goals and potential	*
<i>Atsuko K. Ichikawa</i>	
Jefferson Lab: Experimental facilities, upgrade plans and potential for research related to neutrino-nucleus interactions	5
<i>Stephen A. Wood</i>	
Neutrino scattering physics opportunities with the NuMI beam at Fermilab	14
<i>Jorge G. Morfin</i>	
Possible application of the ICARUS technology for studies of neutrino interactions in the intermediate energy range	9
<i>Flavio Cavanna</i>	
Neutrino oscillation studies and the neutrino cross section	14
<i>Paolo Lipari</i>
